

## CONFIRMATION LETTER

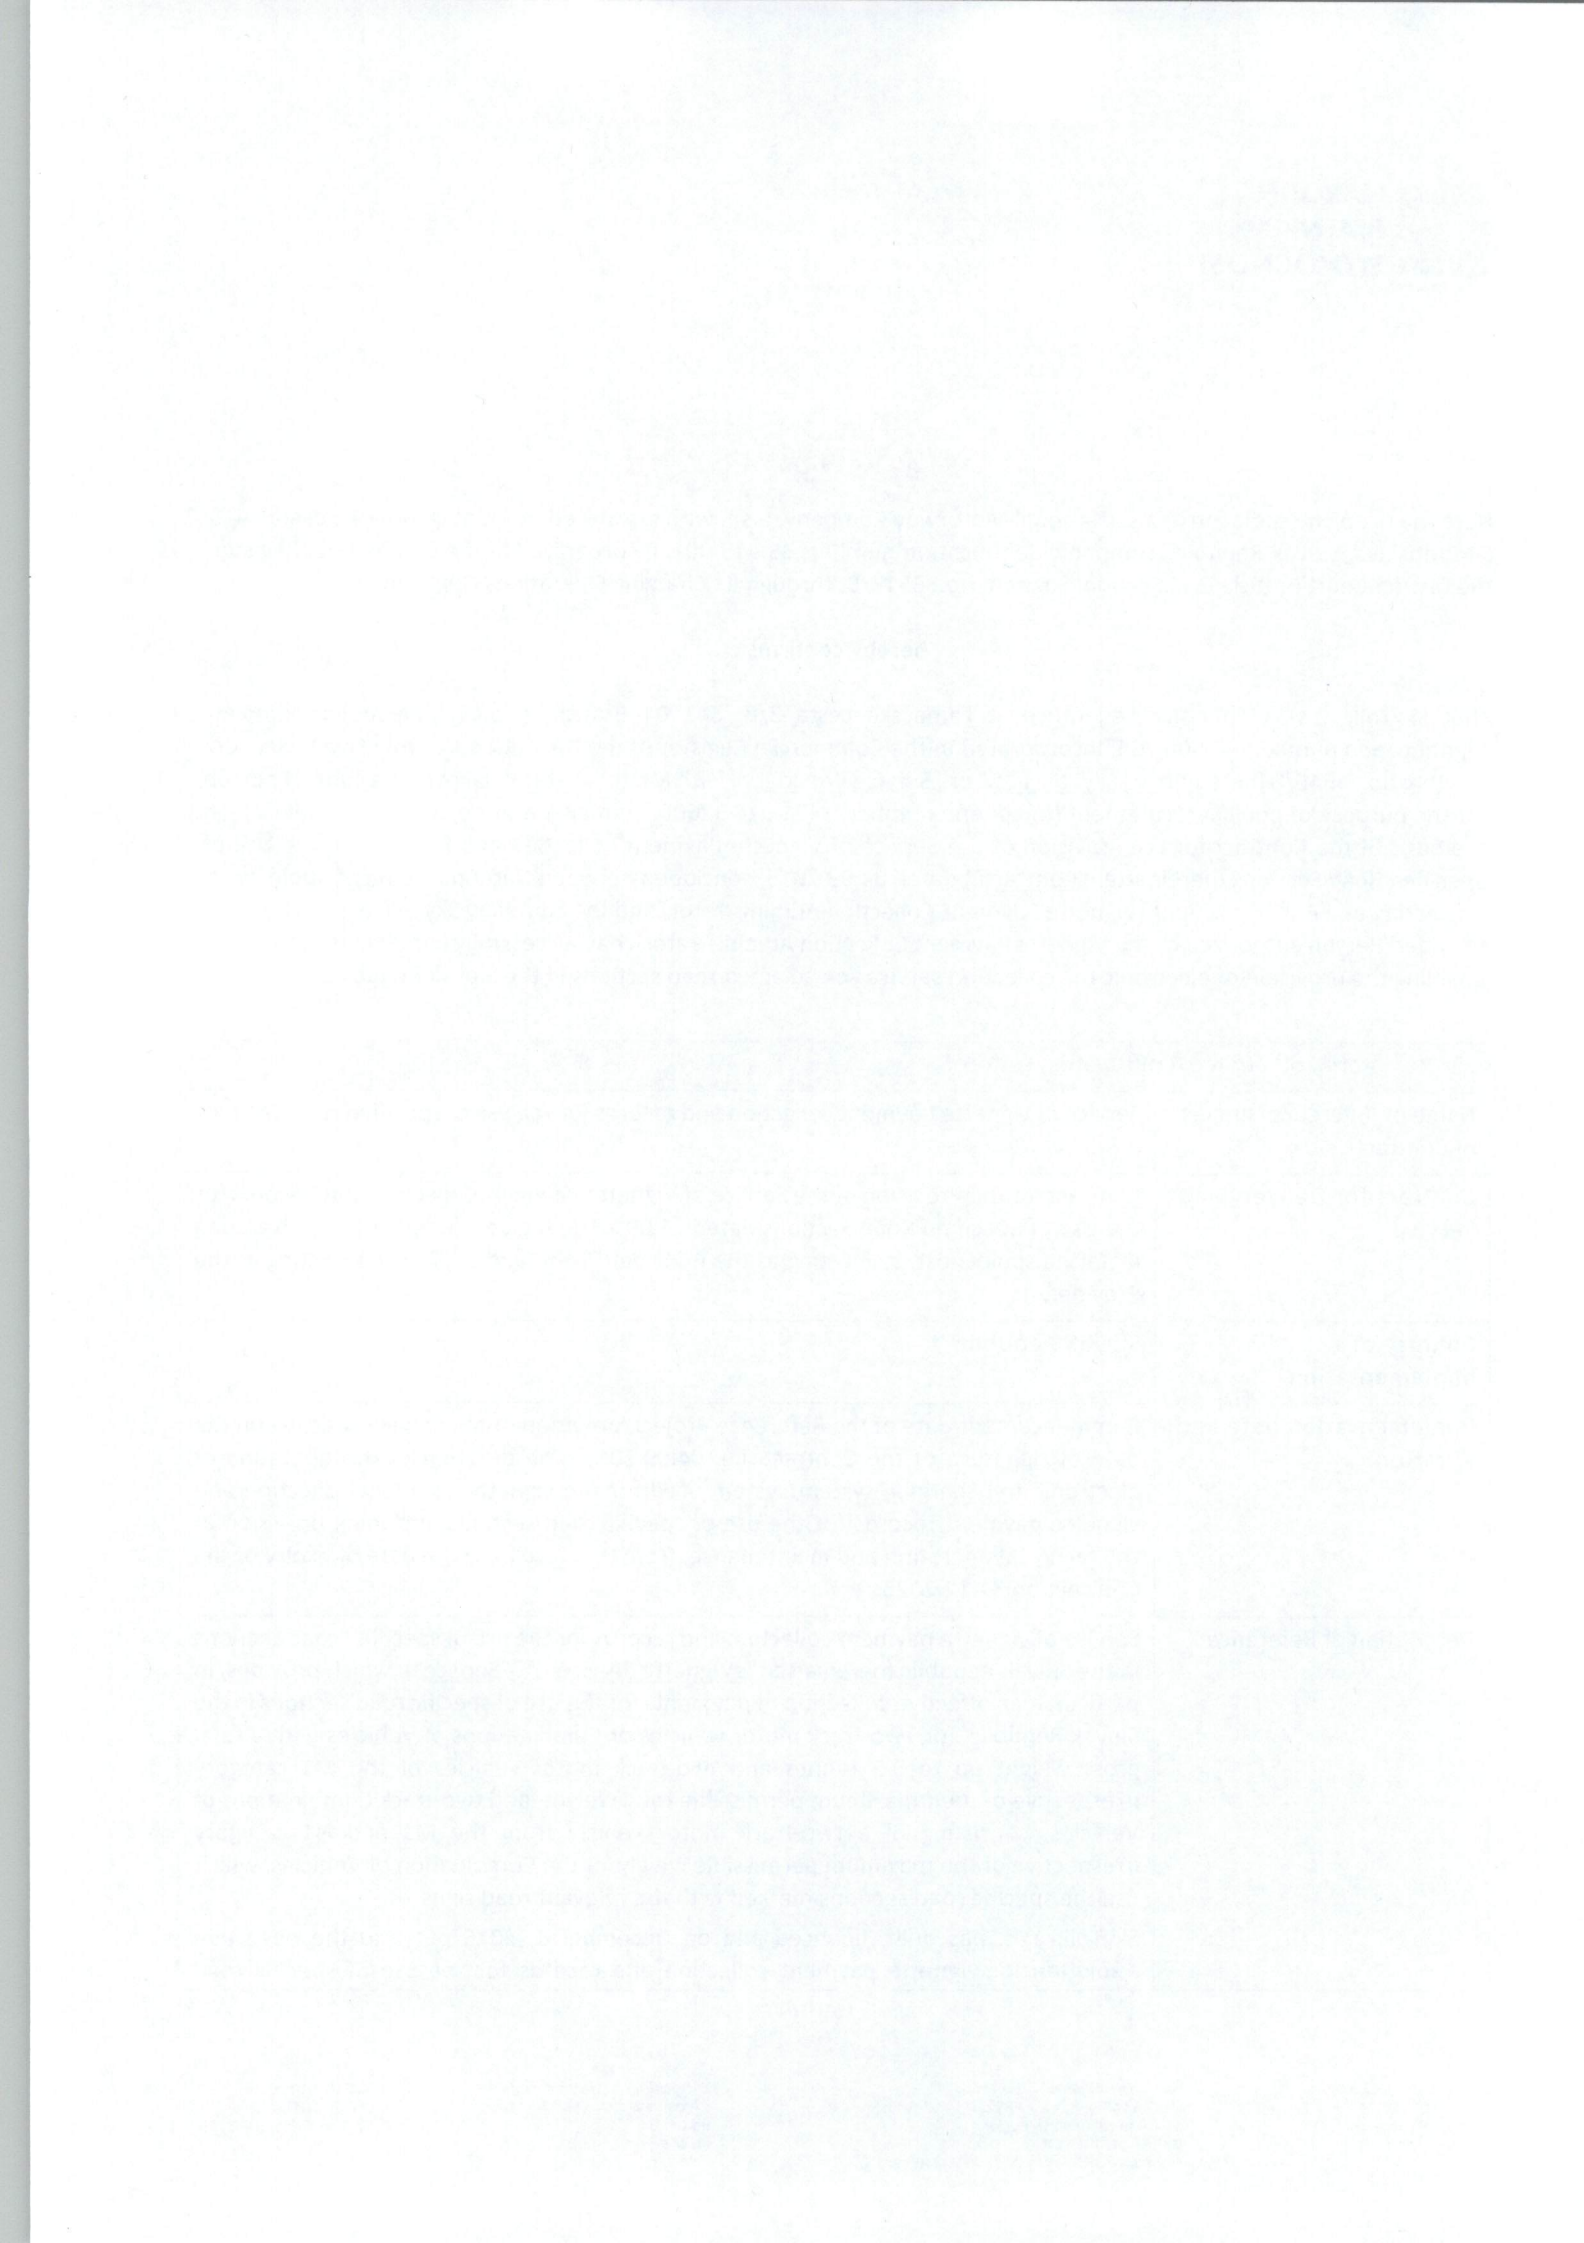

Národná diaľničná spoločnosť, a.s. (National Motorway Company, a.s.), with registered office at Dúbravská cesta 14, 841 04 Bratislava, Slovak Republic, company identification number: 35 919 001, incorporated in the Commercial Register of the District Court Bratislava I., Section: Sa, Item no.: 3518/B, through its Charging Operations Department

### hereby confirms

that SkyToll, a. s., with registered office at Lamačská cesta 3/B, 841 04 Bratislava, Slovak Republic, company identification number: 44 500 734, incorporated in the Commercial Register of the District Court Bratislava I., Section: Sa, Item no.: 4646/B (hereinafter „SkyToll, a. s.“ or „Service Provider“), with Mr. Ing. Peter Polakovič as a contact person for the purpose of public procurement (telephone number: +421 914 326052, e-mail: peter.polakovic@skytoll.sk ), on the basis of the Contract for the Provision of the Service of Vignette Payment Collection and Records for the Use of Specified Road Sections (hereinafter „Contract“) dated 04.09.2015, concluded between Národná diaľničná spoločnosť, a.s., acting as a Principal/Client (Vignette Payment Collection Administrator) and the company SkyToll, a. s., acting as a Provider (Person authorized by the Vignette Payment Collection Administrator), has successfully implemented a project enabling the provision of electronic toll collection services on selected road sections in the Slovak Republic.

Further information to the Confirmation Letter	
Name of Reference/subject of Contract	Service of vignette payment collection and records for the use of specified road sections
Contract for Delivery and Services	Contract for the Provision of the Service of Vignette Payment Collection and Records for the Use of Specified Road Sections dated 04.09.2015 and concluded between Národná diaľničná spoločnosť, a.s., acting as the Principal/Client, and SkyToll, a. s., acting as the Provider.
Country of implementation	Slovak Republic
Implementation date and duration	Commencement date of the Reference Project/provision of the Service: starting on the date of signature of the Contract, i.e. 04.09.2015. The duration of the operation of electronic toll charging system/system used for the vignette payment collection and vignette payment records for the use of specific road sections, including provision of the technical operation and maintenance, from 01.12.2015 to the date of expiry of the Contract on 31.12.2023.
Description of Reference	<p>Service of vignette payment collection and records for the use of specified road sections in the Slovak Republic (hereinafter „<u>eVignette Service</u>“ or „<u>Service</u>“), which provides, in particular, an effective collection of payments for the use of specific road sections in the Slovak Republic, for Two-track motor vehicles or Combinations of Vehicles with a total gross weight up to 3.5 tonnes and two-track motor vehicles of the M1 category irrespective of their maximum permissible total weight, and two-track Combinations of Vehicles, consisting of a two-track motor vehicle from the M1 and N1 category irrespective of the maximum permissible weight of the Combination of Vehicles, which use the specific road sections marked with the relevant road signs.</p> <p>SkyToll, a. s. has built, financed and on December 1, 2015 put into the operation a solution for vignette payment collection and records for the use of specific road</p>

#### Further information to the Confirmation Letter

sections in the Slovak Republic. The aim of the eVignette service is to ensure a proper, continuous and fault-free electronic collection and registration of payments for motorway vignettes and the eVignette services, effectively securing the income of the Vignette Payment Collection Administrator in the Slovak Republic from the collection of payments for motorway vignettes, as well as increased comfort of the customers in the use of specific road sections (hereinafter "Project").

An inseparable part of the Contract is the provision of technical operation and maintenance of a complete electronic toll charging system/system used for the vignette payment collection and vignette payment records for the use of specific road sections in the Slovak Republic.

The Project is based on the principle Design, Build, Finance, Maintain and Operate (DBFMO), while it is built and operated on the same product as electronic toll collection, implemented in the Slovak Republic, which is based in combination with GPS/GIS, GPRS/GSM/mobile telecommunications 2G/3G and DSRC standards, on GNSS (Global Navigation Satellite System) satellite technology, i.e. integrates both passenger cars and heavy-weight goods vehicles.

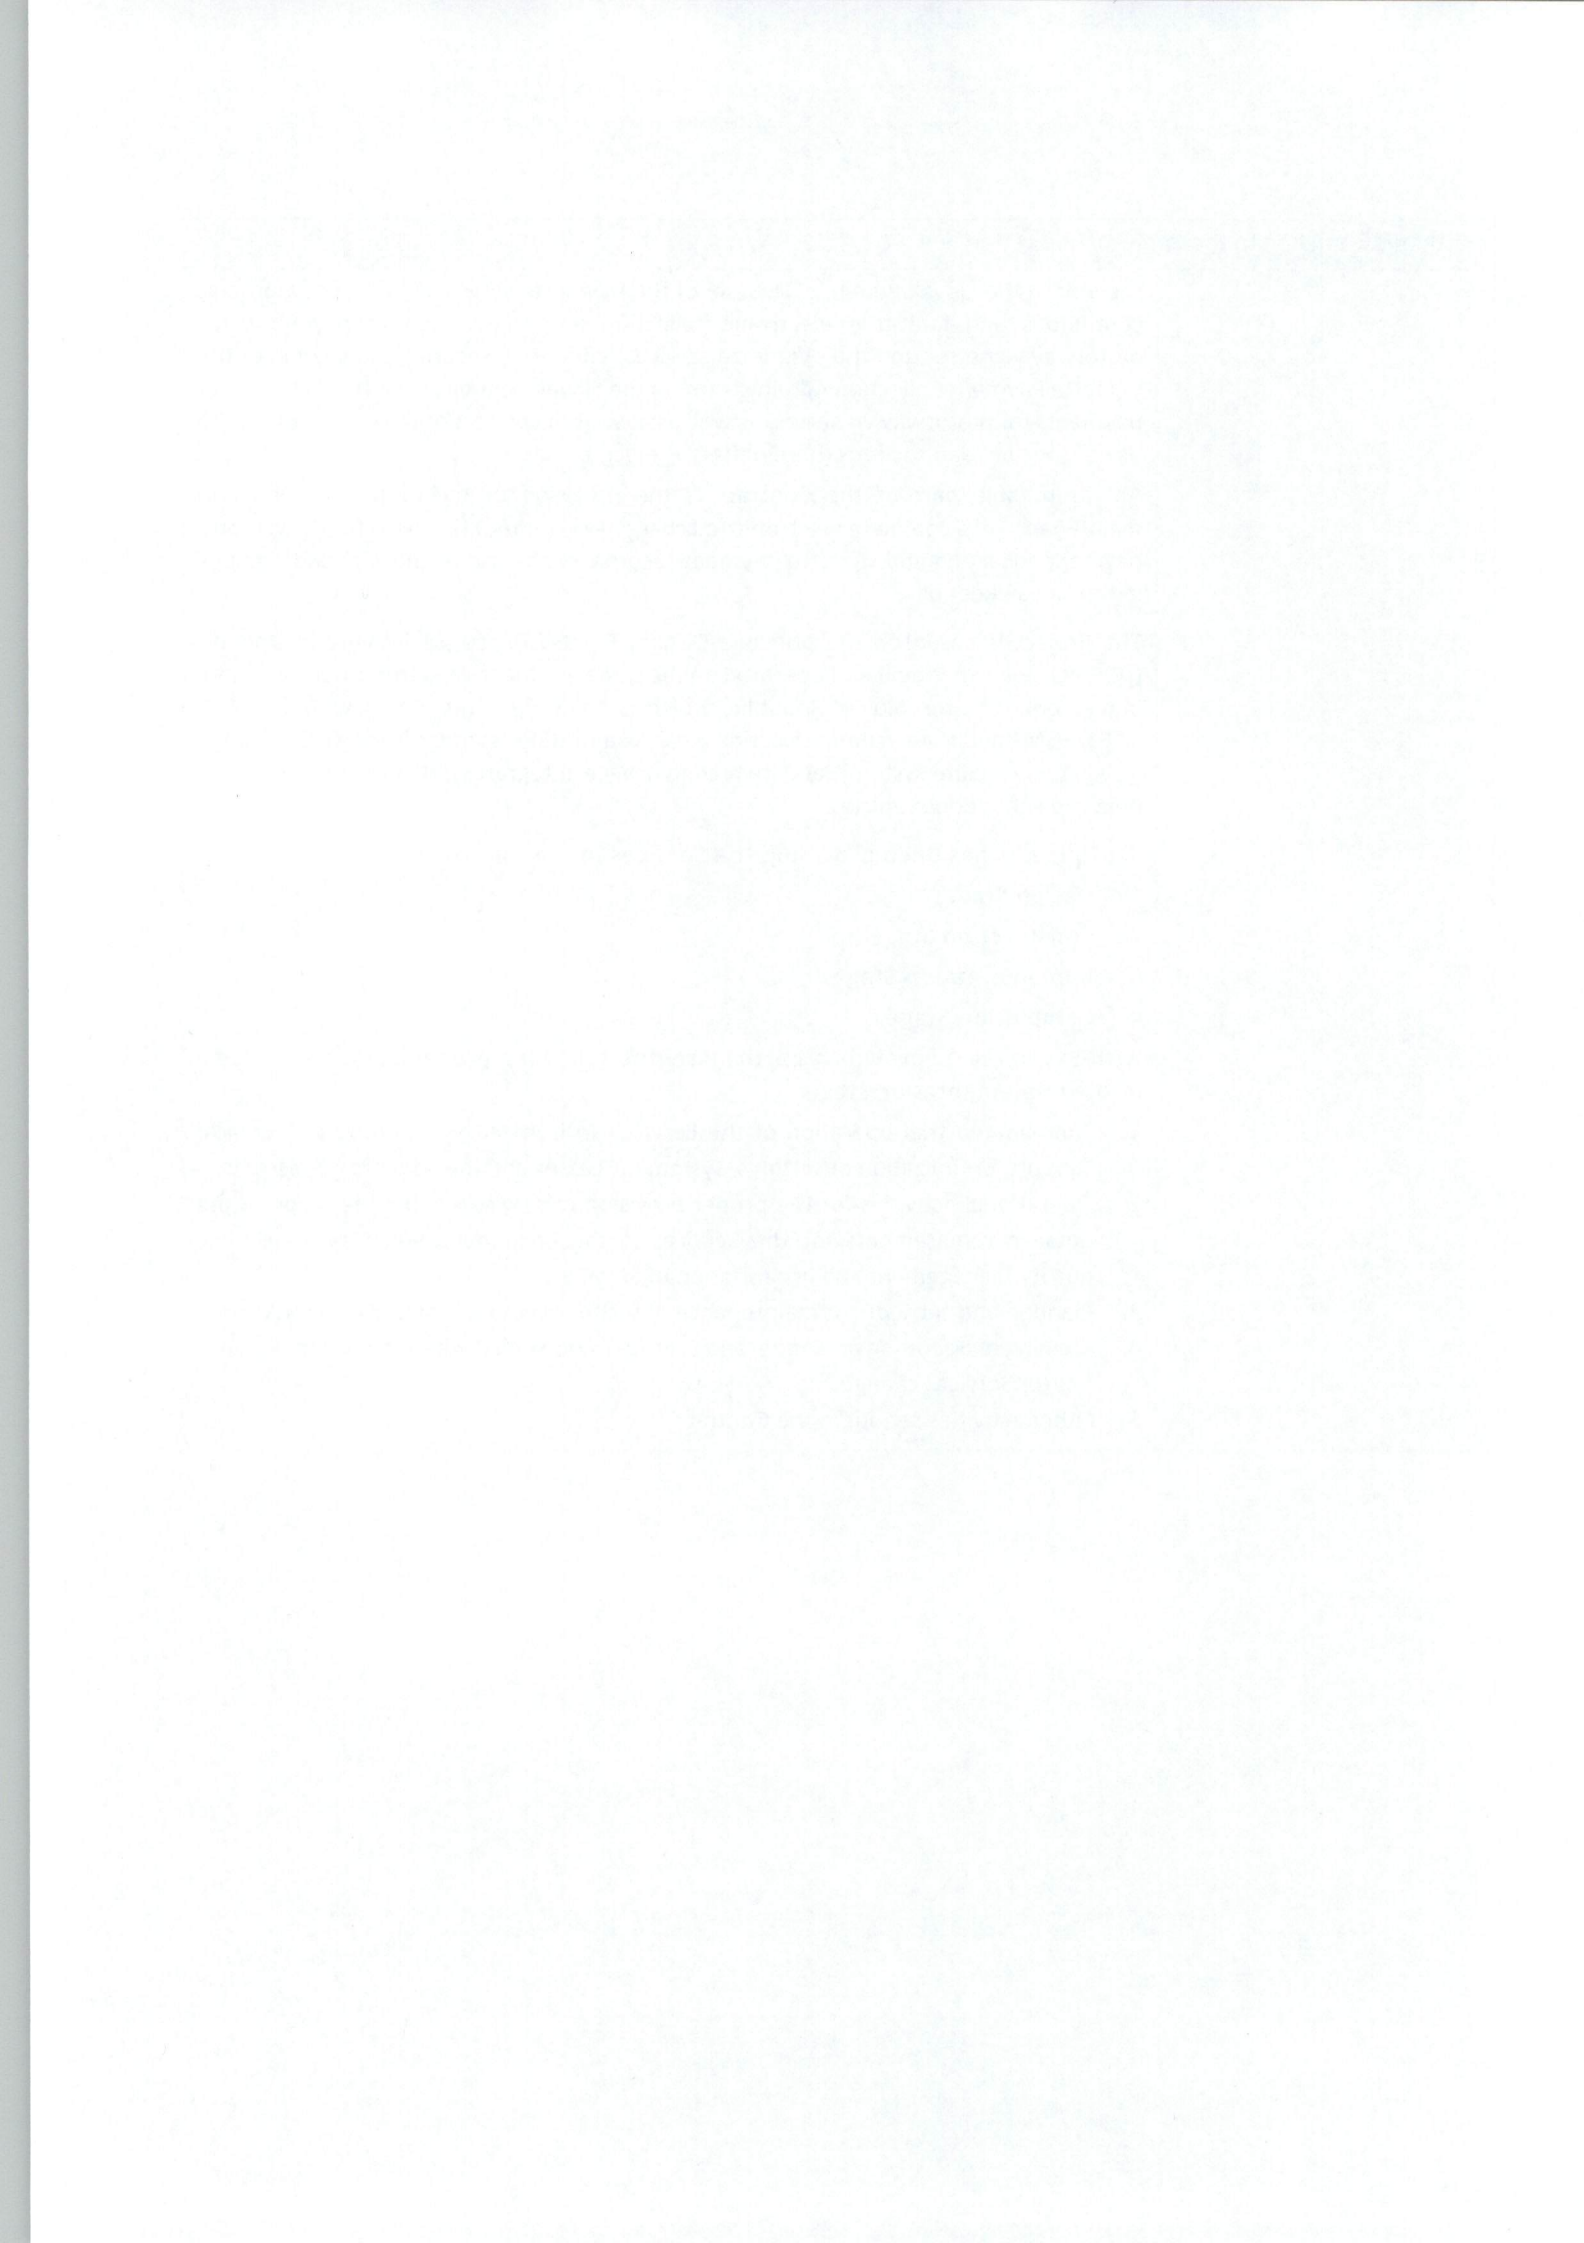

SkyToll, a. s. has been providing the Services in the following extent:

1. Design Stage,
2. Construction Stage
3. Implementation Stage,
4. Completion Stage.

with SkyToll, a. s. providing particularly the following processes/sub-services in the Implementation stage:

1. Time-limited trial operation of the Services with increased intensity of technical support, optimization of settings, system processes and the Services themselves,
2. Operational activities for the proper provision of services within the scope of the detailed requirements for the Services in the Implementation Stage, including quality management and optimization of Services,
3. Planned and subsequent maintenance of technical equipment and other assets,
4. Training of operating personnel and Principal's personnel when the system settings and/or Services change,
5. Other activities set out in the Contract.
