

## National Toll Payment Services plc. – Company Profile

The National Toll Payment Services Public Limited Company (PLC) is a large state-owned company, registered and located in Hungary, Budapest. The official name in Hungarian: Nemzeti Útdíjfizetési Szolgáltató Zrt, previous name: The State Motorway Management Company Ltd. Legal address of the company is 1134 Budapest, Váci út 45. B, Hungary, registration number: 01-10-043108, more information can be found about the company on here: <http://www.toll-charge.hu/>

The National Toll Payment Services Public Limited Company (PLC) mission is to ensure that users of the Hungarian public road network find our toll collection services useful, high-quality and valuable. We also work hard to contribute, through our innovative solutions, to the development of transport in Hungary, and thereby the country's economic and social development. We also strive to secure our leading role and achieve an even better position in the region.

Main business field of the company is to operate and maintain the Hungarian Toll and Road User Charging Systems on more than 6,800 km of toll road network of Hungary. On behalf of the Hungarian Government, the company is responsible for the collection, control, and management of all toll and road user charge fees and supports the enforcement activities related to toll collection in the territory of Hungary. This allows us to operate a diversified, cost-effective and successful system that can develop and to provide full support to the strategic goals of the Hungarian society. Our excellence is acknowledged by the feedbacks from our users' representatives and the professional community.

The HU-GO solution is the most advanced technology as it utilizes the already applied GPS positioning technology, providing a solid basis for other ITS and electronic payment solutions for a much reasonable price than all other competitors on the market. The toll system for commercial vehicles heavier than 3.5 tons is a world-class Hungarian software product that incorporates custom solutions and combines the benefits of known toll collection system.

The company's solid market position is the result of some newly added functions implemented using development funds and conducted in the infrastructure of the toll system. Road charging is one of the major focuses of NTPS Plc., but the HU-GO system is very flexible in terms of the different modules to service other needs.

Other modules and innovations in connection with the tolling systems are the Weigh-In-Motion System (WIM), the On-The-Go Enforcement System, Electronic Public Road Trade Control System and Business Intelligence. The WIM system was implemented in cooperation with the NTPS Plc. is capable of measuring axle loads and the gross weight of heavy-duty vehicles without stopping (free-flow). Identifying and removing overloaded goods motor vehicles from traffic can reduce the number of road accidents, slow down the rate of road deterioration, and improve the competitive position of fair carriers. On-The-Go Enforcement system is able to identify toll violators with much higher efficiency than any other control modes as the system is able to take images of parked and moving vehicles as well and inspect their road user authorizations. Electronic Public Road Trade Control System strengthen the market positions of compliant economic operators, to make circulation of goods more transparent, to eliminate fraud related to food products and to eliminate tax evaders.
